

## **Sword celebrates 3-year IT and IM contract award with leading North Sea operator**

Sword is delighted to have signed a three-year agreement with Ithaca Energy UK Ltd for the provision of Information Technology (IT) and Information Management (IM) services.

The three-year contract utilises Sword's full managed service offerings to deliver a proactive service improvement program for Ithaca Energy. This builds on a working relationship that began in 2019 between Sword and Ithaca Energy, spanning information systems, data, and digitising working processes.

By elevating their IT and IM services to a scalable provider, Ithaca Energy can access relevant specialist expertise and resources on demand to fit their evolving business priorities over the next 3 years and beyond. Stable technology foundations also enables Ithaca Energy to focus on delivering enhancements to their UKCS operations.

Dave Bruce, Chief Executive Officer at Sword, commented:

*"We are delighted to continue and extend our strong working relationship with Ithaca Energy. Sword Group has much to offer with the combination of our extensive Energy Sector experience, strong service management ethos and the wider capabilities of our organisation - we look forward to working alongside Ithaca Energy for the years to come."*

Ian MacKenzie, Technology and Innovation Manager at Ithaca Energy, added:

*"We have an excellent working relationship with Sword and are pleased to have made this contract award. We look forward to collaborating with them to deliver enhanced outcomes to our business and realising the benefits of their breadth and depth of experience."*
