MIGRA*PATH*

UNSTRUCTURED DATA *to* ACTIONABLE INFORMATION
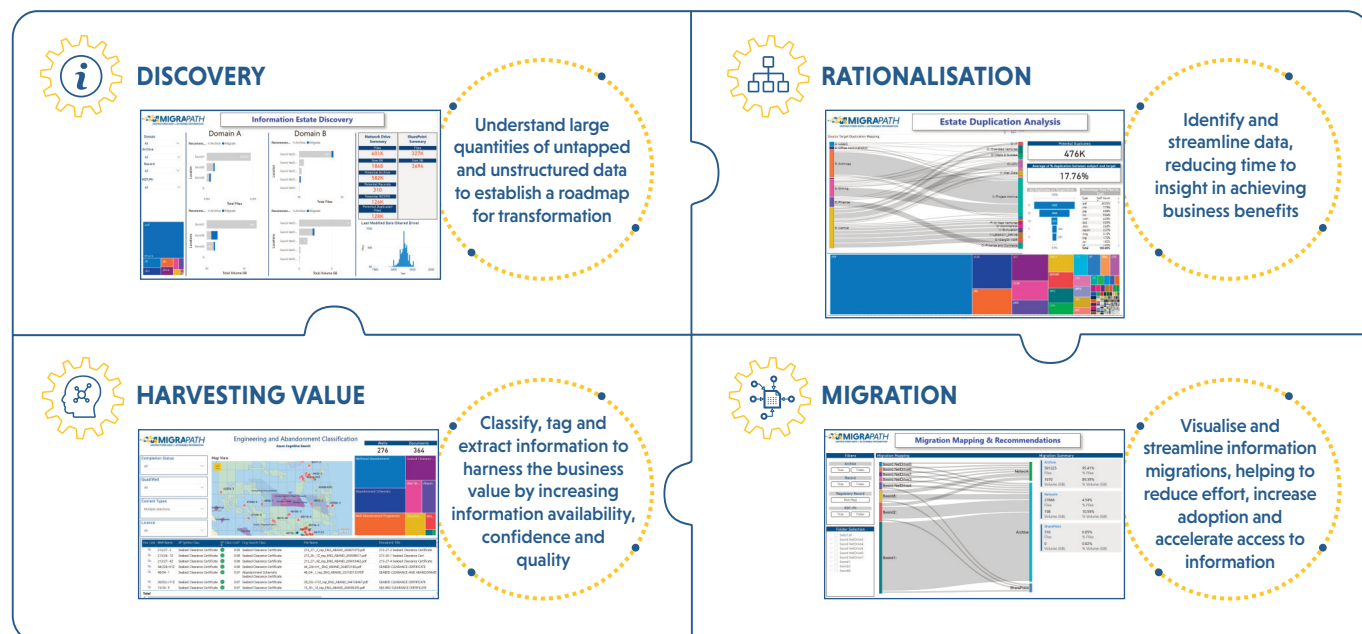

UNSTRUCTURED DATA → DISCOVERY · RATIONALISATION · HARVESTING VALUE · MIGRATION → ACTIONABLE INFORMATION

The Migrapath solution suite tackles complex unstructured data and information management challenges by applying a methodology that integrates our technologies and expertise.

A data-driven approach that enables enterprise-wide clarity, facilitates rationalisation, reduces time to insight and supports informed decision making by leveraging the value of your information and records.

DISCOVERY

Understand large quantities of untapped and unstructured data to establish a roadmap for transformation

RATIONALISATION

Identify and streamline data, reducing time to insight in achieving business benefits

HARVESTING VALUE

Classify, tag and extract information to harness the business value by increasing information availability, confidence and quality

MIGRATION

Visualise and streamline information migrations, helping to reduce effort, increase adoption and accelerate access to information

We tackled a global oil and gas operator's inherited information estate, arisen from various business acquisitions, which was a mix of live and outdated information totaling over 320TB and 25 million+ files. Over 4.8 million duplicate, ROT, Archive and PII files were removed, significantly reducing the time to locate and find the right information. Combined with many other resulting benefits, our MigraPath solution enabled informed business decisions that helped our client to make the most of their acquisitions and increase operational efficiencies.
