Data Engineer, Geneva

SWORD
UPGRADE YOUR BUSINESS

Cylia joined Sword Switzerland on June 1st, 2021, as a Data Engineer. Additionally, she holds the role of Data Practice Lead within Sword.

1. What is your role within Sword ?

On a mission as a Data Engineer on Google Cloud Platform (GCP), I am responsible, among other things, for collecting and making source or transformed data available (e.g., KPIs, segmentations).

I am also the Data Practice Lead at Sword. I organize numerous data-related events, fostering knowledge exchange among Sword consultants—an opportunity to connect and grow together.

Cylia HARBANE
Data Engineer

2. Why did you join our company ?

I joined Sword for many reasons!

- Close proximity to both clients and consultants.
- One of the largest IT providers in French-speaking Switzerland.
- A wide range of events and projects available.
- Opportunities for growth.
- Various training programs, including practice events and external training centers.

Data Engineer

3. What did you like most about this adventure ?

Beyond my roles, I enjoy taking part in Sword events, whether for reviews, training sessions, or unique experiences with Sword's partner: the Dakar Sacré Cœur Association.

Engaging with young Senegalese women, I had the opportunity to share my knowledge on public speaking and creating PowerPoint presentations. This experience also allowed me to discover women's football within a rich and inspiring culture—a fantastic opportunity provided by Sword.
