"It is brilliant people who make Sword shine"

Meet
Adrian BAUDAT
Fullstack developer
& Practice lead

SWORD
UPGRADE *YOUR* BUSINESS

Adrian Baudat joined Sword in February 2024. He is a Fullstack Developer / DevOps and co-Practice Lead of the Development and Architecture Practice at Sword Switzerland.

His expertise focuses on the design of cloud-native applications and on addressing the challenges they involve, from development through to deployment.

1. What is your role within Sword ?

For the past two years, I have been on assignment at Lombard Odier, one of Geneva's leading private banks.

I work at the intersection of development and DevOps, supporting the bank in its digital transformation and the modernization of its applications and processes.

In parallel, I lead the Development Practice at Sword Switzerland, organizing events such as technology showcases and cybersecurity workshops.

Fullstack Developer & Practice Lead

2. Why did you join our company ?

I have long sought a competitive company that would allow me to take on technical challenges while also offering variety and real opportunities for growth.

At Sword, I found all of this and much more. I also had the opportunity to meet a wide range of profiles, from passionate engineers to mentors with over 40 years of experience.

Fullstack Developer & Practice Lead

3. What did you like most about this adventure ?

Sword is a community. I have had the opportunity to meet other colleagues outside of my mission almost every month since I joined the company.

I have also discovered innovative AI technologies during events organized by other Practices.

The friendly moments shared with colleagues during afterworks are among my favorite memories of the past two years.
